

Usability and Accessibility Report

Product Name: **CyArmorHub**

Date: 06/03/2026

Version: 10

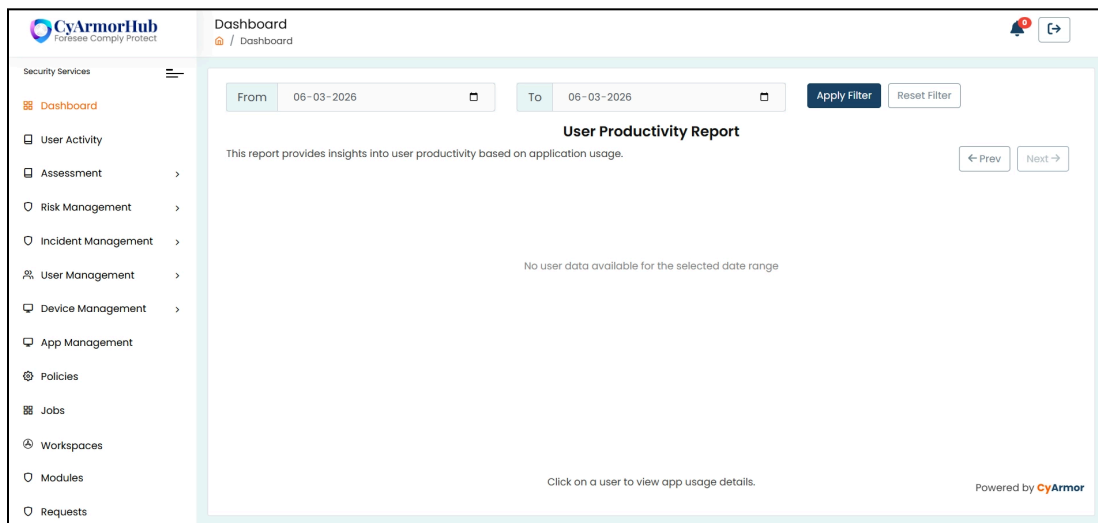

Categories and Criteria

- The Findings in this report are organised into the following categories for clarity and ease of prioritization
 - **Information Architecture:** Concerns related to how content and features are structured, labelled, and organised across the platform.
 - **Navigation:** Concerns related to how users move through the platform
 - **Forms & Interaction:** Concerns related to how users interact with the platform
 - **Design & Layout:** Concerns related to the visual presentation of the platform
 - **Mobile & Responsiveness:** Concerns about how the platform performs and renders across different screen sizes and devices.
 - **Legal & Compliance:** Concerns related to the presence and accessibility of legally required documentation and policies.
 - **Trust & Credibility:** Concerns related to features and content that establish user confidence in the platform.
 - **Web Content Accessibility Guidelines** are internationally recognised standards for making digital content more accessible. The success criteria are broken down into three levels of accessibility.
 - **Level A** - minimum requirement, must be met.
 - **Level AA** - standard compliance target for most products.
 - **Level AAA** - highest level, not always feasible to achieve fully.
-

Findings

- **Absence of the Account page/ Profile page**
Category: Information Architecture

- **Absence of Help & Support page**
Category: Trust & Credibility
Success Criteria: WCAG 3.3.5 - Help (Level AAA)
- **Absence of Privacy, Security & Data Retention Policies page**
Category: Legal & Compliance
Success Criteria: WCAG 1.3.1 - Info & Relationships (Level A)
- **Absence of Legal Documentation page**
Category: Legal & Compliance
- **Absence of Role-Based Access Control (Admin, Analyst, Viewer, etc.)**
Category: Information Architecture
- **No welcome onboarding or orientation for new users of the platform**
Category: Trust & Credibility

⇒ The Home page is a security service itself.

- **Compliance frameworks are exposed as raw navigation items**
Category: Trust & Credibility

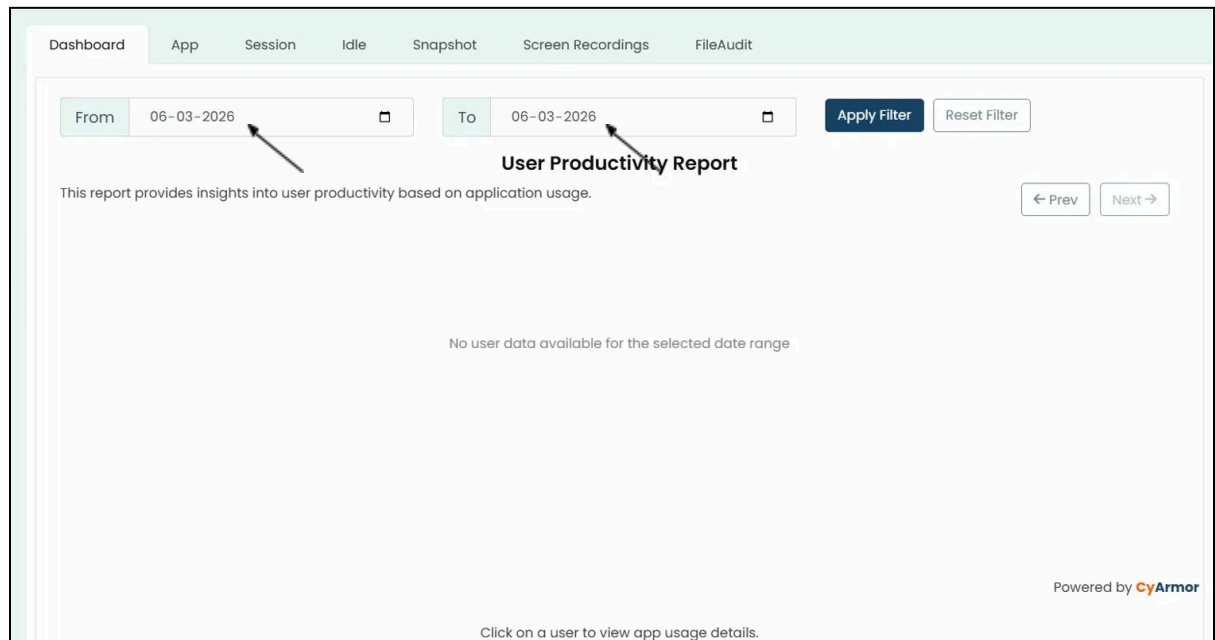

⇒ Preferably available as a consolidated framework section, and certificates may be mentioned on the landing page as cards.

- **The Default State of the dashboard presents no data and an error message.**
No reasoning behind the selected dates

Category: Forms & Interaction

WCAG 3.3.1 - Error Identification (Level A)

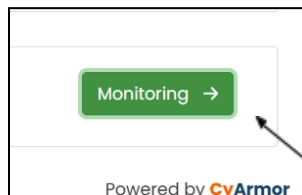

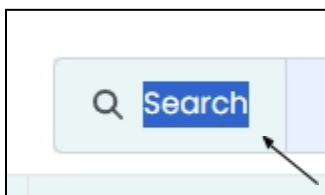

⇒ The default state of forms should be empty, allowing the user to enter the data. This avoids confusion and doesn't invalidate the utility of filters and other functionalities

- **No Indication of button clicking or No Status Message / Screen Update after clicking**

Category: Forms & Interaction

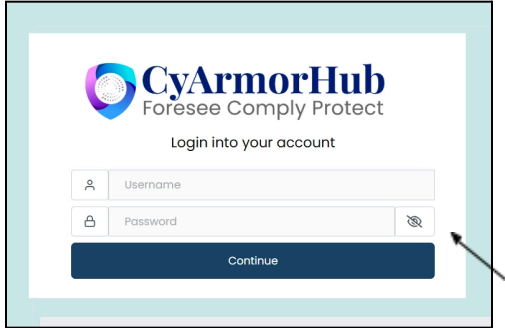

WCAG 4.3.1 - Status Messages (Level A)

- **Alternative Authentications**

Category: Forms & Interaction

WCAG 3.3.8 - Accessible Authentication (Level AA)

⇒ Authentication must not rely solely on cognitive function tests or memory, and must support password managers and alternative login methods such as multifactor, identity service providers, and biometric sign-in.

- **Keyboard Operability**

Category: Navigation

WCAG 2.1.1 - Keyboard (Level A)

⇒ Every function and interaction on the platform can be performed using a keyboard alone, without requiring a mouse or touch input

- **Horizontal Scrolling**

Category: Navigation

WCAG 1.4.10 - Reflow (Level AA)

Powered by CyArmor

⇒ Horizontal and vertical scrolling on the same page should be avoided.

- **Lack of Sufficient Colour Contrast between Sidebar and Work Area**

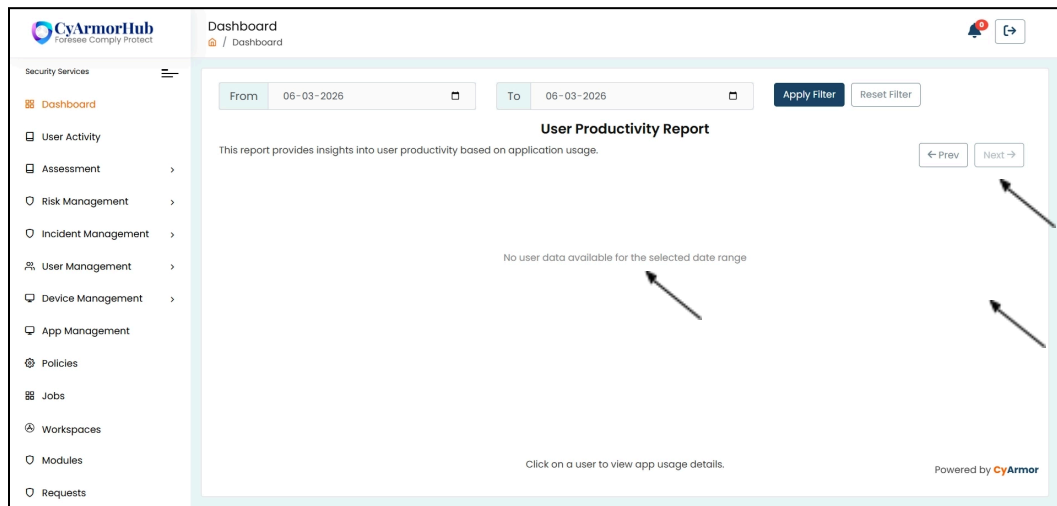

Category: Design & Layout

WCAG 1.4.1 - Use of Colour (Level A)

- **Minimum Contrast between Background and Text**

Category: Design & Layout

WCAG 1.4.3 - Contrast Minimum (Level AA)

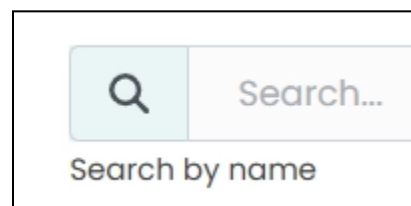

- **Lack of Brand Identity and Cohesive Design. Underutilized Color palette**

Category: Design & Layout

⇒ A Design system ensures a consistent look and behaviour, and removes repetitive decision-making.

- **Redundant or Misleading Headings with Inconsistent Typographic Hierarchy**

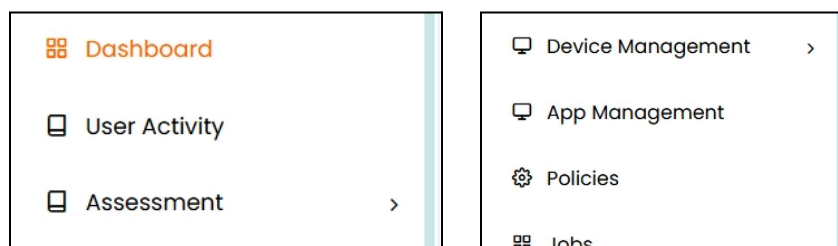

Category: Information Architecture

- **Redundant Sidebar Icons**

Category: Information Architecture

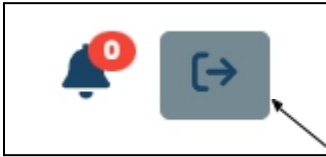

WCAG 2.4.6 - Headings and Labels (Level AA)

- **The purpose of a button needs to be shown on hover**

Category: Forms & Interaction

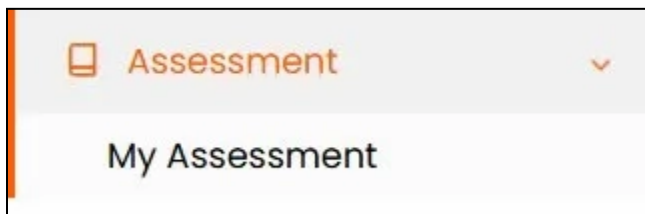

WCAG 4.1.4 - Name, Role, Value (Level A)

⇒ Button needs to show 'logout'.

- **Single option under Expand. Redundancy in titles**

Category: Information Architecture

⇒ Can be consolidated into a single service.

- **Cross-platform Compatibility is Unestablished**

Category: Mobile & Responsiveness

Summary

- While the platform demonstrates functional capability across its core features, this review surfaced a number of significant usability and accessibility concerns that, if unaddressed, are likely to hinder user adoption and confidence.
- The Absence of Privacy & Security Policies and Legal Documentation represent critical risks given the sensitive nature of the data the platform handles, and should be prioritised independently of other remediation efforts.
- Several findings - particularly those relating to Information Architecture and Interaction - would benefit from domain research, user research and moderated usability sessions to confirm severity and priority.
- Overall experience reflects an absence of cohesive brand identity and a consistent design language. Establishing them before proceeding with further remodelling is recommended.
