SUMMARY

Computer Science undergraduate who **designs and builds**, taking a problem from user research and information architecture to a shipped, coded interface. Delivered two freelance products end to end, including an **accessibility-first platform for persons with disabilities**, and audited live products against WCAG. Seeking a first design internship on a team that cares about **inclusive design**.

EDUCATION

KL University, Hyderabad Expected May 2027
Bachelor of Technology (Honours), Computer Science and Engineering — CGPA: 9.44

FREELANCE EXPERIENCE

Blackbox Global Foundation — blackbox.org.in Jul 2026 – Present
Product Designer & Full-Stack Developer *Freelance*

- Designed and built the Blackbox INDEX™ leaderboards and company dashboards, ranking Indian firms on disability inclusion, with a screen-reader equivalent for every chart (WCAG AA).
- Designed its AI data pipeline: crawled 1,239 regulatory filings from 413 companies, sent only relevant pages to the model, and traced every score to its source page on a 10-metric framework.

Charrish Travels — charrishtravels.com Aug 2026 – Sep 2026
End-to-End Designer & Developer *Freelance*

- Drawing on customer input from the client, designed a mobile-first site around enquiry instead of a booking engine to suit custom itineraries: WhatsApp on every page and pre-filled tour enquiries.
- Structured tour pages around the client's real packages (trip facts, day-by-day timeline, temple and overnight stops) and built a tool that turns a pasted itinerary into a published page.

SELECTED PROJECTS

CareerCraft — UX/UI Designer Mar 2026

- Ran user research, then restructured the information architecture and led a full UX redesign across 9 platform modules, now used by 3,000+ KL University students.

Vivaha — Product Designer & Full-Stack Developer Jun 2026 – Present

- Designed and built the Discover feed for a trust-network matrimonial app: trust-distance visualisation, connector-path modal, shared components, and a two-tier profile privacy model.

INDEPENDENT AUDITS

Usability & accessibility audits of live products, requested by each team and delivered as reports.

- CyArmorHub** (Mar 2026): 20 WCAG-referenced findings across IA, navigation, and forms.
- SkaleChat** (Jul 2026): 33 WCAG-referenced findings, incl. blocking onboarding bugs and legal gaps.

SKILLS

Design Tools & Methods: Figma, User Research, Wireframing, Prototyping, Information Architecture, Usability Testing, Accessibility (WCAG) Auditing, Design Systems

Development: HTML/CSS, JavaScript/TypeScript, React, React Native, Next.js, Astro, Tailwind, Git

CERTIFICATIONS

- Google UX Design Professional Certificate — Google (Coursera), May 2026
- Claude Code 101 — Anthropic, Jul 2026
